What is RISE with SAP?

Your ticket into the future of ERP

RISE with SAP is a comprehensive offering designed to transition your current SAP ECC and SAP S/4HANA on-premise installation to the cloud.

Cloud Solutions

to Future-proof your business

An overview of RISE with SAP

Get the capabilities, infrastructure, and services you need

Solution components

SAP S/4HANA Cloud, private edition

- Migrate your ERP system to a tailored-to-fit cloud solution.
- Drive innovation and unlock efficiencies through intelligent automation.

SAP Signavio

- Assess your processes and get recommendations on how to improve them.
- Begin your redesign with preconfigured best practices.

SAP Build and SAP Business Technology Platform

- Automate with pre-built content.
- Make faster and better decisions with AI and templates.
- Use a low-code approach to build cloud-ready extensions.

Cloud infrastructure

Managed Infrastructure & application-level SLA

- Use an optimized architecture for high performance and availability, operated by SAP, including application-level SLAs.

Global Hyperscaler Infrastructure

- Deploy in your preferred hyperscaler infrastructure with no additional contracts.

Security, risk & Compliance

- Ensure security by design with SAP's Data Security Trust Model.
- Comply with the most stringent regulatory requirements.

Migration and adoption services

Tools and Methodologies

- Analyze your current system and processes quickly.
- Use industry benchmarks and best practices.

Cloud Application Services (CAS)

- Ensure predictable outcomes and fixed costs from application operations to innovation adoption.

Partners & Community

- Leverage partners and user groups from one of the largest ERP ecosystems worldwide.
- Choose from hundreds of certified partner extensions.

RISE with SAP Packaging

Base Edition

Provides small organizations with SAP S/4HANA Cloud, private edition functionalities with a lean setup

Premium Edition

Offers additional capabilities for business process management, process automation and low-code business application development

Premium Plus Edition

Extends premium by including additional capabilities for Generative AI, sustainability, an advanced OCFO suite, and additional access to supplier networks

People

SAP S/4HANA Cloud Private Edition, is a **cutting-edge cloud-based ERP system** that leverages advanced technologies and covers **all lines of business** with **role-based overview pages** and deep integration for full transparency.

The solution comes with **best practices** for **64 country/region** versions in **39 languages** and incorporates best-in-class processes across **25 industries**.

With SAP S/4HANA Cloud Private Edition, companies can easily **migrate their existing ERP system** to the cloud, protecting their current IT investments.

Transform Your Business Processes

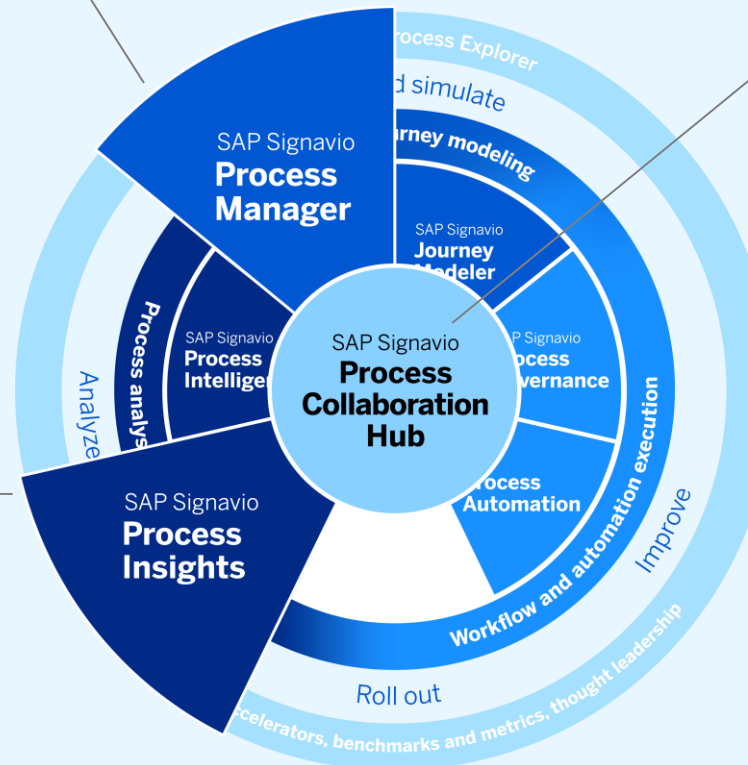

Gain the visibility needed to automate and innovate effectively

Co-create your future processes

- Collaborate with your team on improving and **reinventing your processes** using a **single source of truth**.
- Model, design, document **all steps**.

Identify and remove bottlenecks

- Gain instant insights into your current process performance to understand **where to transform**.
- Leverage recommendations to understand **how to transform**.

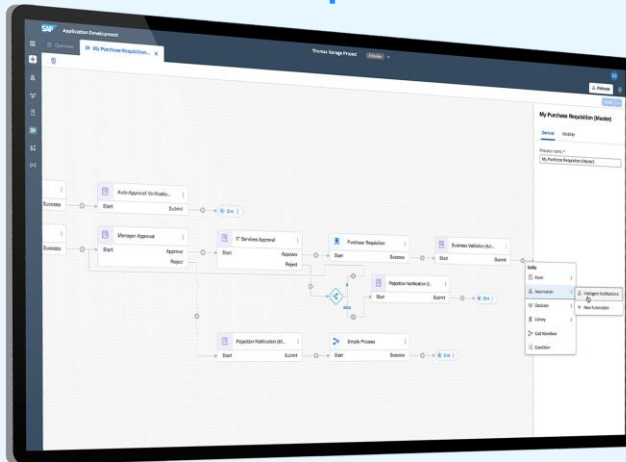

Improve your business continuously

- Provide **full transparency** over your processes and who is responsible for which task.
- Engage all stakeholders and create a **culture of constant optimization**.

Create Your Own Apps and Automate Processes

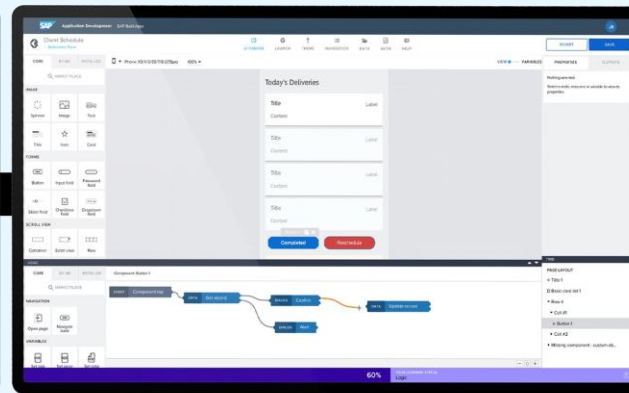

Extend your existing enterprise solutions easily

Automate processes

SAP Build Process Automation

Compose apps

SAP Build Apps

Design business sites

SAP Build Work Zone

BUILD VISUALLY
INTEGRATE SEAMLESSLY
COLLABORATE SECURELY

SAP Business Technology Platform

1 Empower business users and scale development – Automate daily tasks with low-code functionality

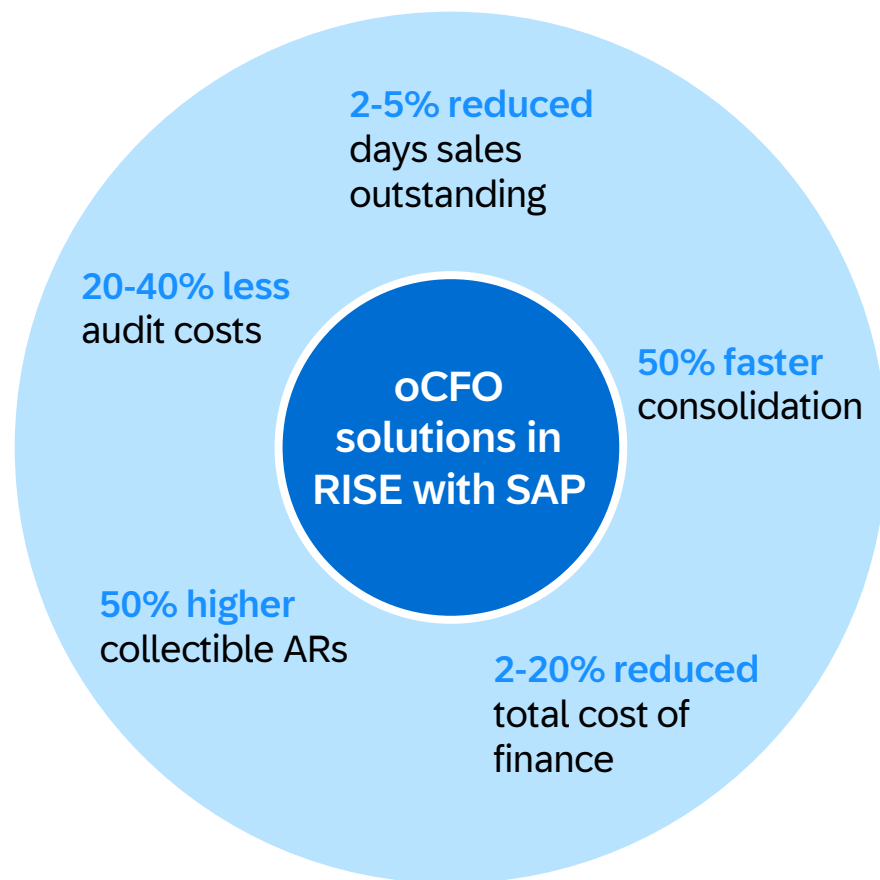

2 Keep the core clean – Extend and automate beyond SAP S/4HANA in-app development capabilities

3 Visualize and continuously enhance processes
Work collaboratively, get process improvement recommendations; further enhance with SAP Signavio

Adapt to Dynamic Markets with Enhanced oCFO Solutions

Create a more agile, resilient, and sustainable finance function

Companies benefit from **embedded finance processes** that deliver:

Cash management

Centralize cash operations

Get real-time cash visibility and payment traceability for fast analysis and actions.

[Learn more](#)

Receivables management

Improve working capital

Accelerate cash collections and dispute resolution; create adaptive credit processes.

[Learn more](#)

Group reporting

Report with confidence

Streamline financial consolidation and unify operational and group reporting.

Group reporting data collection

Improve data quality

Collect non-financial and non-ERP data quickly and with easy auditability.

[Learn more](#)

Analytics cloud for planning

Forecast with precision

Deliver smart planning that combines predictive and real-time insights.

Unleash Your Business Data

Leverage your data – from every source

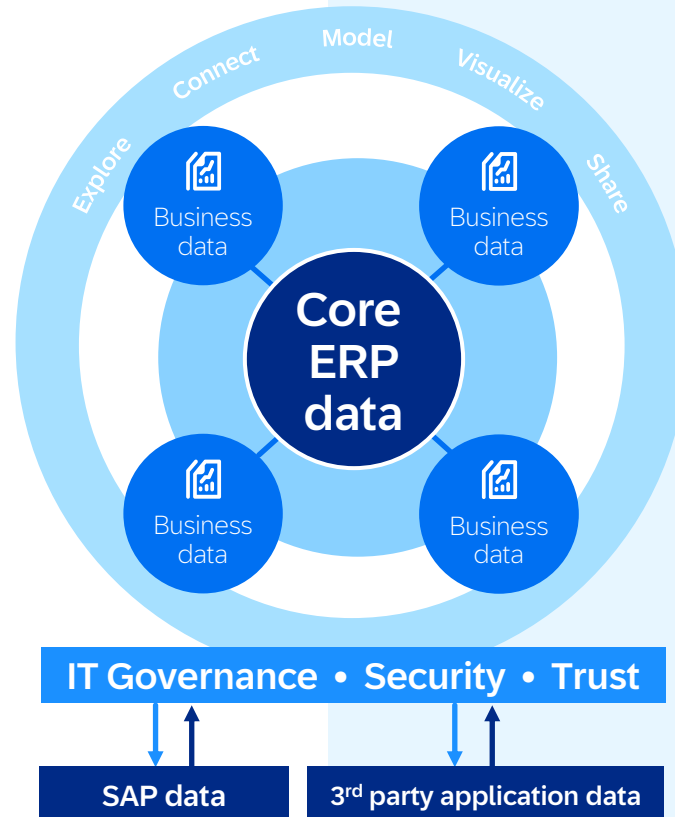

SAP Datasphere

SAP Datasphere is a comprehensive service to deliver seamless and scalable access to mission-critical business data beyond ERP.

» Access authoritative data

» Enrich all data projects

» Simplify the data landscape

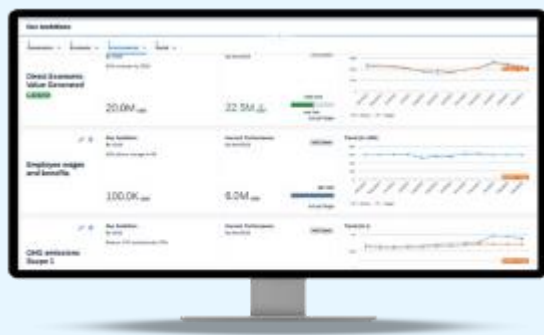

Benefits

- **Simplify the ever-growing data landscape**
Integrate your data and AI platforms to deliver data in business terms from multiple systems and locations.
- **Implement self-service data access to trusted business data**
Provide governed self-service access to data products in business-friendly terms.
- **Facilitate real-time data access to support your business**
Support operational applications with insights and analytics across hybrid and multi-cloud environments.
- **Accelerate trusted decisions**
Deliver centralized governance, privacy, and compliance for every data professional, across all data sources.

Measure, Report, and Accelerate Your Path to Sustainability

Establish a green ledger – and enable sustainable, profitable business models

SAP Sustainability Control Tower

Automated, auditable, and compliant Environmental, Social and Governance (ESG) reporting, with accurate data and insights to embed sustainability into core business processes

Standard semantic frameworks supported:

+ Global Reporting Initiative
+ EU Taxonomy

Record: Create accurate ESG factors from actual data instead of averages.

Report: Generate audit-ready ESG metrics for regulatory compliance and stakeholder confidence.

Act: Utilize actionable insights for future planning, set targets, and uncover new profitable and sustainable business model opportunities.

SAP Sustainability Footprint Management

Carbon accounting software that calculates the carbon footprint of your business and products, providing insights that enable you to drive decarbonization across your value chain

Sustainability frameworks and databases (excerpt):

+ Greenhouse Gas Protocol

Record: Easily leverage existing data from SAP S/4HANA Cloud, third-parties, suppliers, and facility energy flows for data acquisition and footprint distribution.

Report: Get auditable corporate and product carbon footprints at scale and assess your sustainability footprint.

Act: Make informed decisions on reduction targets for Scopes 1, 2 and 3, and generate analytical insights from carbon footprint data.

Intelligent Cloud ERP

Drive business growth and foster innovation with a cloud ERP powered by AI

Business

**Accelerate processes
and optimize decisions**

AI-powered processes and data-driven insights and recommendations to make faster, safer decisions

People

**Multiply productivity
and increase efficiency**

Transform work through automation and simplified user experiences to drive business outcomes

AI helps your...

Business

Reinvent customer service

with personalized experiences that address customer needs quickly

Boost finance excellence

with AI that helps optimize working capital and closing functions

Drive operational excellence

by optimizing manufacturing and asset performance and elevating product quality

Advance intelligent order fulfillment

by streamlining and automating the order fulfillment process

People

Empower end users

to eliminate redundant tasks and increase efficiency

Interact with your business

using natural language for informational, navigational and transactional assistance

Uncover insights

that would otherwise be challenging or time-consuming to discover

Extend Your Cloud ERP to Your Supplier Network

Collaborate securely and easily with global trading partners

Automate your procurement workflows

- Digitalize repetitive paper-based transactions to realize operational efficiencies, reduce operating costs, and save time.
- Shorten your time to value with standardized workflows and document types, while onboarding suppliers faster.

Collaborate with suppliers transparently

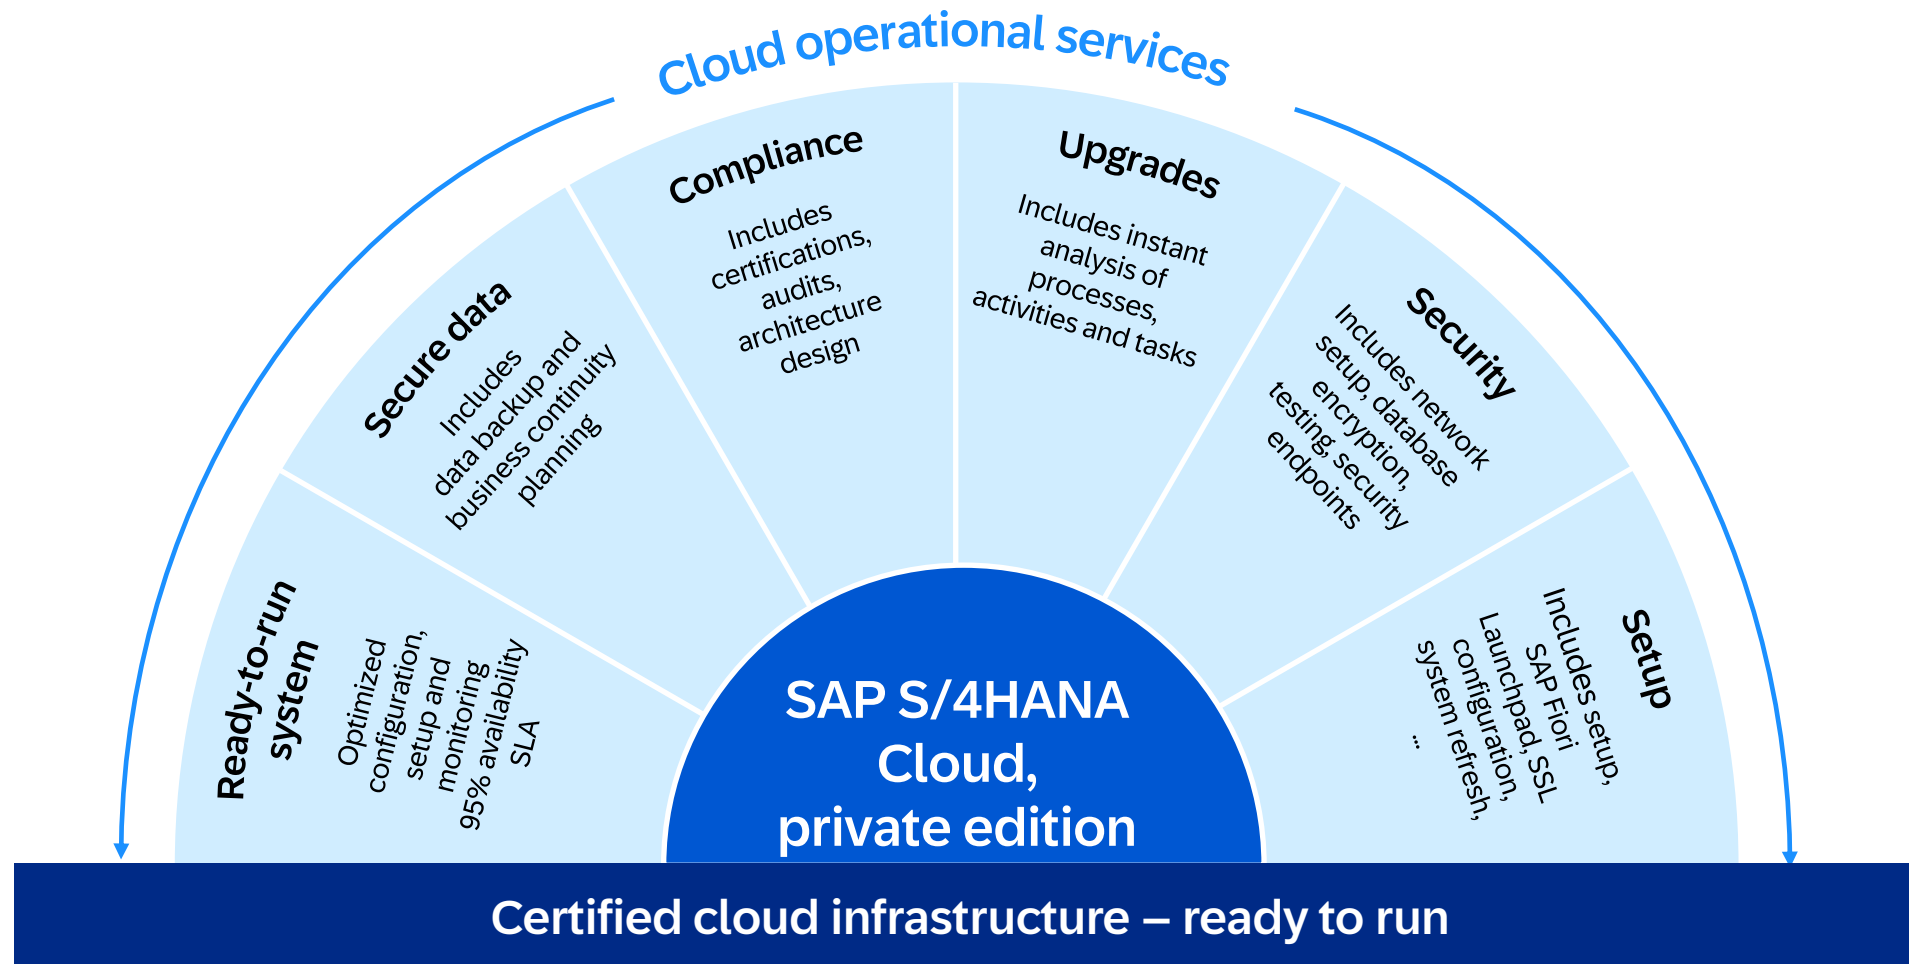

- Connect and transact with a community of global suppliers and buyers.
- Easily collaborate with suppliers on invoices to reduce inquiries and leverage early-payment discounts to improve your working capital.

Simplify business process compliance

- Leverage network validation and configurable business rules to eliminate errors and ensure spend compliance.
- Automatically apply negotiated rates and contract details in ERP-generated purchase orders and catalogs.

Run Your Technology Operations as a Service

Get everything you need from a single trusted partner

Safeguard Your Applications and Infrastructure

Become a secure-by-default company

In 2022, the global average cost of a data breach reached a **record-breaking \$4.25M¹** and is expected to increase to **\$5M²** in 2023.

Mitigate the stress of managing your cloud security, so you can focus on your business.

1.
Build
securely

2.
Run
securely

3.
Act
securely

- **Gain peace of mind** with 24/7 surveillance and security updates³ to protect your software and data.
- **Improve risk and compliance transparency** and adhere to local and global regulations immediately.
- **Simplify usage** with shared responsibilities and guidance for secure pre-built extensions and add-ons.
- **Optimize spend management** with predictable total cost of ownership.
